Reflex Sensor
for Roller Conveyor Systems

OPT1541
Part Number

- **Energy savings thanks to EcoMode**
- **Increased capacity thanks to intelligent functions**
- **Optimized performance**
- **Time-saving initial start-up with fast-clip mounting system and quick wiring**
- **Wireless settings via NFC**

These sensors have been specially designed for use in accumulation roller conveyors. Their compact design allows for installation between rollers below the transport level. High-precision background suppression makes it possible to reliably detect even black objects at up to 900 mm. Settings are entered via wireless NFC, which is even possible in the de-energized state. Thanks to the innovative fast-clip mounting system and quick wiring, the sensors are installed and ready for use in no time flat.
