**Dimensions** 

CE **OIO**-Link

## **Model Number**

# OBT40-R102-2P1-IO-0,3M-V1

Triangulation sensor (BGS) with fixed cable and M12 connector, 4-pin

#### **Features**

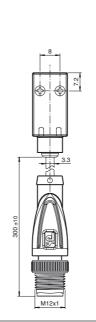

- Miniature design with versatile • mounting options
- Best background suppressor in its ٠ class
- Precision object detection, almost • irrespective of the color
- Extended temperature range -40°C ... 60°C
- High degree of protection IP69K
- IO-link interface for service and process data

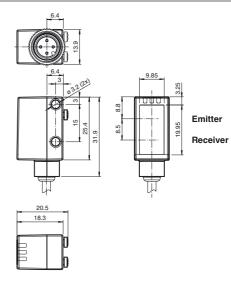

### **Product information**

The miniature optical sensors are the first devices of their kind to offer an end-to- end solution in a small single standard design - from thru-beam sensor through to a distance measurement device. As a result of this design, the sensors are able to perform practically all standard automation tasks.

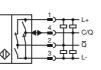

The DuraBeam laser sensors are durable and can be used in the same way as a standard sensor.

The use of Multi Pixel Technology gives the standard sensors a high level of flexibility and enables them to adapt more effectively to their operating environment.
