#### **Model Number**

### MLV41-55/25/115/136

Retroreflective sensor with 2 m fixed cable

#### Features

- Rugged series in corrosion-resistant metal housing
- Extremely high switching frequency
- Clear and functional display concept for the operating modes
- Resistant against noise: reliable operation under all conditions
- Aluminum housing with high quality Delta-Seal coated

## **Product information**

The unique and extremely popular design of the MLV41 series enables it be mounted correctly in confined areas and offers all the functions that are normally only found on larger phototelectric sensors. The MLV41 series comes with a range of functions. For example, highly visible status LEDs on the front and back, resistance to ambient light, crosstalk protection and universally applicable output stages that permit every possible switching logic and polarity to be realized. The enhanced resistance to ambient light ensures reliable operation even where modern energy-saving lamps with electronic ballasts are in use. The same applies where multiple devices are present, i.e. the use of a number of sensors in the same vicinity causes no problems.

## **Electrical connection**

Option:

$$\bullet$$
 = Light on  $\bullet$  = Dark on

## Indicators/operating means

 1
 Operating display green
 3
 Optical axis transmitter

 2
 Function display yellow
 4
 Optical axis receiver
