

 $\epsilon$ 

## **Model Number**

## OMT150-R100-2EP-IO-V31-L

Distance sensor with 4-pin, M8 x 1 connector

## **Features**

- Miniature design with versatile mounting options
- Space-saving distance sensors in small standardized design
- Multi Pixel Technology (MPT) exact and precise signal evaluation
- DuraBeam Laser Sensors durable and employable like an LED
- IO-link interface for service and process data

# **Product information**

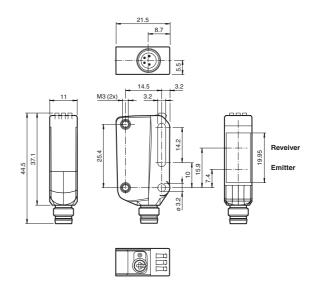

The R100 series miniature optical sensors are the first devices of their kind to offer an end-to-end solution in a small single standard design — from thru-beam sensor through to a distance measurement device. As a result of this design, the sensors are able to perform practically all standard automation tasks.

The entire series enables sensors to communicate via IO-Link.

The DuraBeam laser sensors are durable and can be used in the same way as a standard

The use of Multi Pixel Technology gives the standard sensors a high level of flexibility and enables them to adapt more effectively to their operating environment.

## **Dimensions**

## **Electrical connection**

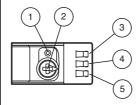

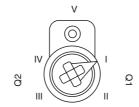

## **Pinout**

Wire colors in accordance with EN 60947-5-2

BN WH BU BK (brown (white) (blue) (black)

## Indicators/operating means

	1	Teach-in button		
	2	Mode rotary switch		
	3	Switch output indicator Q2		
	4	Switch output indicator Q1		
ĺ	5	Operating indicator		

ı	Switch output 1 / switch point B	
П		
Ш	Switch output 2 / switch point A	
ΙV	Switch output 2 / B	
٧	Keylock	

### **Technical data**

#### **General specifications**

Measurement range 60 ... 150 mm

Reference target standard white, 100 mm x 100 mm

laser diode Light source

modulated visible red light Light type

Laser nominal ratings

Note LASER LIGHT, DO NOT STARE INTO BEAM

Laser class 680 nm Wave length

Beam divergence > 5 mrad d63 d63 < 1 mm in the range of 50 mm ... 250 mm

Pulse length

approx. 3 kHz Repetition rate max. pulse energy 15.2 nJ max. +/- 1.5  $^{\circ}$ Angle deviation

Diameter of the light spot approx. 2 mm at a distance of 150 mm

Angle of divergence approx. 1

Ambient light limit EN 60947-5-2: 30000 Lux

Resolution 0.1 mm

### Functional safety related parameters

 $MTTF_d$ 560 a 20 a Mission Time (T<sub>M</sub>) 0 % Diagnostic Coverage (DC)

## Indicators/operating means

Operation indicator LED green:

constantly on - power on flashing (4Hz) - short circuit

flashing with short break (1 Hz) - IO-Link mode

Function indicator LED yellow:

constantly on - switch output active constantly off - switch output inactive

Control elements

Control elements 5-step rotary switch for operating modes selection

## Electrical specifications

10 ... 30 V DC Operating voltage  $U_{B}$ Ripple max. 10 %

No-load supply current < 25 mA at 24 V supply voltage  $I_0$ 

Protection class

#### Interface

Interface type IO-Link (via C/Q = pin 4) Device profile Smart Sensor COM 2 (38.4 kBaud)

Transfer rate IO-Link Revision 3 ms

Min. cycle time Process data witdh Process data input 3 Byte Process data output 2 Bit

SIO mode support

Device ID 0x110906 (1116422)

Compatible master port type

## Output

Switching type The default setting is:

C/Q - Pin4: NPN normally open, PNP normally closed, IO-Link

Q2 - Pin2: NPN normally open, PNP normally closed

2 push-pull (4 in 1)outputs, short-circuit protected, reverse Signal output polarity protected, overvoltage protected

max. 30 V DC

Switching voltage Switching current max. 100 mA, resistive load

Usage category DC-12 and DC-13 < 1.5 V DC Voltage drop  $U_{d}$ 

Response time 2 ms

Conformity

Communication interface IEC 61131-9 EN 60947-5-2 Product standard EN 60825-1:2014 Laser safety

Measurement accuracy

0.05 %/K Temperature drift Warm up time 5 min ≤1% Repeat accuracy Linearity error ±1%

**Ambient conditions** 

Ambient temperature 10 ... 60 °C (50 ... 140 °F) -40 ... 70 °C (-40 ... 158 °F) Storage temperature

**Mechanical specifications** 

Housing width 11 mm Housing height 44.5 mm 21.5 mm Housing depth

## Laserlabel

## CLASS 1 LASER PRODUCT

IEC 60825-1: 2007 certified. Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50. dated June 24, 2007

# CLASS 1 LASER PRODUCT

IEC 60825-1: 2007 certified. Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007

## **Accessories**

## V31-GM-2M-PUR

Female cordset, M8, 4-pin, PUR cable

#### V31-WM-2M-PUR

Female cordset, M8, 4-pin, PUR cable

## IO-Link-Master02-USB

IO-Link master, supply via USB port or separate power supply, LED indicators, M12 plug for sensor connection

Other suitable accessories can be found at www.pepperl-fuchs.com

Degree of protection	IP67 / IP69 / IP69K
Connection	M8 x 1 connector, 4-pin
Material	
Housing	PC (Polycarbonate)
Optical face	PMMA
Mass	approx. 10 g
Approvals and certificates	
UL approval	E87056, cULus Listed, class 2 power supply, type rating 1
FDA approval	IEC 60825-1:2007 Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007

## **Preferences**

## Teach-In:

You can use the rotary switch to select the relevant switching threshold A and/or B for teaching in for switch signal Q1 or Q2.

The yellow LEDs indicate the current state of the selected output.

To store a threshold value, press and hold the "TI" button until the yellow and green LEDs flash in phase (approx. 1 s). Teach-In starts when the "TI" button is released.

Successful Teach-In is indicated by alternating flashing (2.5 Hz) of the yellow and green LEDs.

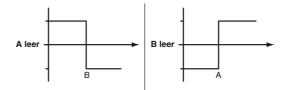

An unsuccessful Teach-In is indicated by rapidly alternating flashing (8 Hz) of the yellow and green LEDs.

After an unsuccessful Teach-In, the sensor continues to operate with the previous valid setting after the relevant visual fault signal is issued.

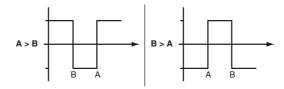

Different switching modes can be defined by teaching in the relevant distance measured values

for the switching thresholds A and B:

Single point mode:

#### Window mode:

Every taught-in switching threshold can be retaught (overwritten) by pressing the "Tl" button again.

Pressing and holding the "TI" button for > 4 s completely deletes the taught-in value. The yellow and green LEDs go out simultaneously to indicate that this procedure has been completed. Successful resetting is indicated by alternating flashing (2.5 Hz) of the yellow and green LEDs.

## **Resetting to Factory Default Settings**

Press the "Tl" button for > 10 s in rotary switch position ,O' to reset to factory default settings. The yellow and green LEDs go out simultaneously to indicate the resetting.

Resetting process starts when the "TI" button is released and is indicated by the yellow LED. After the process the sensor works with factory default settings, immediately.

## OMT:

- Factory default settings switch signal Q1:
- Switch signal active, window mode
- Factory default settings switch signal Q2: Switch signal active, window mode

## OQT:

267075-100195\_eng.xml

2018-06-08

- Factory default settings switch signal Q1:
- Switch signal active, BGS mode (background suppression)
- Factory default settings switch signal Q2:
  - Switch signal active, BGS mode (background suppression)

## Configuration via IO-Link interface

# Setting different operating modes via the IO-Link interface

The devices are equipped with an IO-Link interface as standard for diagnostics and parameterization tasks to ensure optimum adjustment of the sensors to the relevant application.

## Single point mode operating mode (one switch point):

- "Detection of objects irrespective of type and color in a defined detection range. Objects in the background are suppressed.
- "The switch point corresponds exactly to the set point.

Background

# Window mode operating mode (two switch points):

- Detection of objects irrespective of type and color in a defined detection range. Reliable detection when object leaves the detection range.
- · Window mode with two switch points.

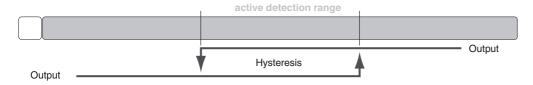

# Center window mode operating mode (one switch point):

- Detection of objects irrespective of type and color in a defined detection range. Sets a defined window around a given object. Objects outside this window are not detected.
- Window mode with one switch point.

# Two point mode operating mode (hysteresis operating mode):

· Detection of objects irrespective of type and color between a defined switch-on and switch-off point.

# Inactive operating mode:

· Evaluation of switching signals is deactivated.
