Distance sensor

(UL **O**IO-Link US

Model Number

OMT150-R100-2EP-IO-L

Distance sensor with fixed cable

Features

CE

- Miniature design with versatile • mounting options
- Space-saving distance sensors in ٠ small standardized design
- Multi Pixel Technology (MPT) exact • and precise signal evaluation
- DuraBeam Laser Sensors durable and employable like an LED
- IO-link interface for service and process data

Product information

The R100 series miniature optical sensors are the first devices of their kind to offer an end-to-end solution in a small single standard design - from thru-beam sensor through to a distance measurement device. As a result of this design, the sensors are able to perform practically all standard automation tasks.

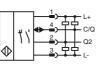

The entire series enables sensors to communicate via IO-Link.

The DuraBeam laser sensors are durable and can be used in the same way as a standard sensor.

The use of Multi Pixel Technology gives the standard sensors a high level of flexibility and enables them to adapt more effectively to their operating environment.

General specifications			
Measurement range		60 150 mm	
Reference target		standard white, 100 mm x 100 mm	
Light source		laser diode	CLASS 1
Light type		modulated visible red light	LASER PRODUCT
Laser nominal ratings			
Note		LASER LIGHT , DO NOT STARE INTO BEAM	
Laser class		1	
Wave length		680 nm	
Beam divergence		> 5 mrad d63 d63 < 1 mm in the range of 50 mm 250 mm	CLASS 1
Pulse length		3 μs	LASER PRODUCT
Repetition rate		approx. 3 kHz	IEC 60825-1: 2007 certified.
max. pulse energy		15.2 nJ	Complies with 21 CFR 1040.10 and 1040.11 except
Angle deviation		max. +/- 1.5 °	for deviations pursuant to
Diameter of the light spot		approx. 2 mm at a distance of 150 mm	Laser Notice No. 50, dated June 24, 2007
Angle of divergence Ambient light limit		approx. 1 ° EN 60947-5-2 : 30000 Lux	
Resolution		0.1 mm	
Functional safety related para	motore	0.111111	
• •	meters	560 a	
MTTF _d Mission Time (T _M)		20 a	CLASS 1
Diagnostic Coverage (DC)		0%	
Indicators/operating means			LASER PRODUCT
Operation indicator		LED green:	IEC 60825-1: 2007 certified.
		constantly on - power on	Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to
		flashing (4Hz) - short circuit	Laser Notice No. 50, dated June 24, 2007
Free stiens in diseases		flashing with short break (1 Hz) - IO-Link mode	
Function indicator		LED yellow: constantly on - switch output active	
		constantly off - switch output inactive	
Control elements		Teach-In key	Accessories
Control elements		5-step rotary switch for operating modes selection	Vat CM on DUD
Electrical specifications			V31-GM-2M-PUR
Operating voltage	UB	10 30 V DC	Female cordset, M8, 4-pin, PUR cable
Ripple		max. 10 %	V31-WM-2M-PUR
No-load supply current	I ₀	< 25 mA at 24 V supply voltage	Female cordset, M8, 4-pin, PUR cable
Protection class		III	
Interface			IO-Link-Master02-USB
Interface type		IO-Link (via C/Q = pin 4)	IO-Link master, supply via USB port or
Device profile		Smart Sensor	separate power supply, LED indicators,
Transfer rate		COM 2 (38.4 kBaud)	M12 plug for sensor connection
IO-Link Revision		1.1	
Min. cycle time		3 ms	Other suitable accessories can be found at
Process data witdh		Process data input 3 Byte Process data output 2 Bit	www.pepperl-fuchs.com
SIO mode support		Yes	
Device ID		0x110906 (1116422)	
Compatible master port type		A	
Output			
Switching type		The default setting is:	
		C/Q - BK: NPN normally open, PNP normally closed, IO-Link	
		Q2 - WH: NPN normally open, PNP normally closed	
Signal output		2 push-pull (4 in 1)outputs, short-circuit protected, reverse	
Switching voltage		polarity protected, overvoltage protected max. 30 V DC	
Switching current		max. 30 v DC max. 100 mA , resistive load	
Usage category		DC-12 and DC-13	
Usage calegory		≤ 1.5 V DC	
Voltage drop		1.5 V BO	
Voltage drop Besponse time	U _d	2 ms	
Response time	Ud	2 ms	
Response time Conformity	Ud		
Response time Conformity Communication interface	Ud	IEC 61131-9

Degree of protection	IP67 / IP69 / IP69K
Connection	2 m fixed cable
Material	
Housing	PC (Polycarbonate)
Optical face	PMMA
Mass	approx. 36 g
Cable length	2 m
Approvals and certificates	
UL approval	E87056 , cULus Listed , class 2 power supply , type rating 1
FDA approval	IEC 60825-1:2007 Complies with 21 CFR 1040.10 and

1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007

Preferences

Teach-In:

You can use the rotary switch to select the relevant switching threshold A and/or B for teaching in for switch signal Q1 or Q2.

The yellow LEDs indicate the current state of the selected output.

To store a threshold value, press and hold the "TI" button until the yellow and green LEDs flash in phase (approx. 1 s). Teach-In starts when the "TI" button is released.

Successful Teach-In is indicated by alternating flashing (2.5 Hz) of the yellow and green LEDs.

An unsuccessful Teach-In is indicated by rapidly alternating flashing (8 Hz) of the yellow and green LEDs.

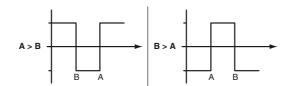

After an unsuccessful Teach-In, the sensor continues to operate with the previous valid setting after the relevant visual fault signal is issued. Different switching modes can be defined by teaching in the relevant distance measured values

for the switching thresholds A and B:

Single point mode:

Window mode:

Every taught-in switching threshold can be retaught (overwritten) by pressing the "TI" button again.

Pressing and holding the "TI" button for > 4 s completely deletes the taught-in value. The vellow and green LEDs go out simultaneously to indicate that this procedure has been completed. Successful resetting is indicated by alternating flashing (2.5 Hz) of the yellow and green LEDs.

Resetting to Factory Default Settings

Press the "TI" button for > 10 s in rotary switch position ,O' to reset to factory default settings. The yellow and green LEDs go out simultaneously to indicate the resetting.

Resetting process starts when the "TI" button is released and is indicated by the yellow LED. After the process the sensor works with factory default settings, immediately.

OMT:

- Factory default settings switch signal Q1:
- Switch signal active, window mode
- Factory default settings switch signal Q2: Switch signal active, window mode

OOT:

issue:

- Factory default settings switch signal Q1:
- Switch signal active, BGS mode (background suppression)
- Factory default settings switch signal Q2:
- Switch signal active, BGS mode (background suppression)

Configuration via IO-Link interface

Setting different operating modes via the IO-Link interface

The devices are equipped with an IO-Link interface as standard for diagnostics and parameterization tasks to ensure optimum adjustment of the sensors to the relevant application.

Single point mode operating mode (one switch point):

- "Detection of objects irrespective of type and color in a defined detection range. Objects in the background are suppressed.
- "The switch point corresponds exactly to the set point.

active detection range

Singapore: +65 6779 9091 fa-info@sg.pepperl-fuchs.com

Background suppression

Window mode operating mode (two switch points):

- Detection of objects irrespective of type and color in a defined detection range. Reliable detection when object leaves the detection range.
- · Window mode with two switch points.

active detection range **Background suppression** Foreground suppression

Center window mode operating mode (one switch point):

- Detection of objects irrespective of type and color in a defined detection range. Sets a defined window around a given object. Objects outside this window are not detected.
- Window mode with one switch point.

active detection range
