Model Number

RLK29-55-5060

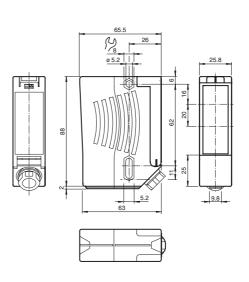

Retroreflective sensor With terminal compartment; with mounting materials

Features

- ٠ Robust, compact photoelectric sensor for single-beam gate protection
- High detection ranges achievable
- 2500 V Proof voltage between the ٠ relay connection terminals and the device electronics
- Not sensitive to ambient light, even ٠ with energy saving lamps
- Version with accessories in scope of delivery

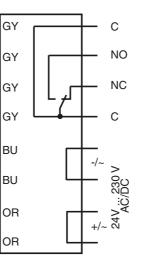

Product information

Series 29 is a range of low-cost and, most importantly, reliable photoelectric sensors for monitoring industrial doors, elevators, and automatic gates. Their high degree of protection makes them the ideal solution for tasks outdoors and at thresholds, and in harsh environments. These "universalvoltage sensors" can be operated with any supply voltage from 24 V to 240 V, and with direct current or alternating current.
